

BrickLAB - Zoo

Discover the animal kingdom with BrickLAB at St. Michael's School!

Traverse tricky terrain, shake claws with lobsters, and design ecosystems in this life science enrichment program. Students travel from the sands of the Sahara to the peaks of the Himalayas and discover the diversity of animal adaptations, the differences in habitats, and what's necessary for each biome to thrive. Through creative thinking, collaboration, and multi-subject integration, BrickLAB Zoo fosters a unique bond to the Earth's biospheres and the vital roles animals play in them.
